

# **HCSS Safety**

Milestone uses one of the industry's most robust and comprehensive safety software programs (HCSS). HCSS is more than forms and mere compliance, it's a real safety system that engages crews and makes safety reporting and easy and painless part of daily workflows. HCSS Safety allows teams/crews in the field to hold safety meetings, conduct inspections, perform JSAs, manage employee skills and certifications, report safety observations "Good Catches", and report near miss and incident from the field. Milestone's safety professionals can analyze reports, review open items, schedule meetings and inspections for the field, and run analytics to identify trends. With HCSS Safety Milestone is able to make every foreman a safety guy, spot trends before incidents occur, know what each employees qualifications are, make inspections easy and resolve issue faster, provide more instructions in the field, identify high-risk areas, and create a culture of safety.

- **Receive real-time safety observations and near miss reports:** *real-time reporting from the field allows for quick action and timely training for high-risk areas.*
- **Access to over 1,500 pre-built meetings and JSAs:** *Assist crews in knowing exactly how to stay safe in the field with easy to use tools that highlight job hazards and relevant topics.*
- **Over 200 pre-built inspections:** *Keeps operators and everyone on the job safer with effortless inspections that just require a few taps on mobile device.*
- **Skills & certification tracking:** *Confidently put the right workers on the job to ensure safety as well as compliance. Know who is qualified or has proper skills without having to track down a sheet of paper.*

## TOP BENEFITS

Get real-time data from your foremen as they perform their safety activities in the field.

Analyze leading indicators to spot trends on where additional training is needed before an incident occurs.

Create a culture of safety so that everyone goes home safe every day.
